Company Description: Maganti IT Solutions operates with the zeal of a start-up, to provide expert software design and development services to a suite of clients. We are a firm that is passionate about technology, and utilizing such in pursuit of solving business and real-world challenges.

Make IT possible. Our goal is to reach our clients expectations. We have various vertical markets we attack offering relevant solutions, and therefore we do not live and breathe in only a "single technology" or "one-technology-fits-all-mindset". Each project potentially offers something new. We have a driving passion for software excellence.

Job Description: Maganti IT Solutions are seeking highly motivated and experienced individuals to join our team of developers in a fast-paced environment.

An ideal candidate is a diligent, hardworking individual who is able to learn new systems and processes rapidly; is capable of thinking objectively while collaborating with the team members and is able to deliver outstanding work.

Responsibilities

• Delivering a complete front end application

• Ensuring high performance on mobile and desktop

• Writing tested, idiomatic, and documented JavaScript, HTML and CSS

• Coordinating the workflow between the graphic designer, the HTML coder, and yourself

• Cooperating with the back-end developer in the process of building the RESTful API

• Communicating with external web services

Skills and Qualifications

• Proficiency with JavaScript and HTML5,Professional, precise communication skills

• Deep knowledge of NodeJS , Angular 2/4 practices and commonly used modules based on extensive work experience

• Creating self-contained, reusable, and testable modules and components

- Ensuring a clear dependency chain, in regard to the app logic as well as the file system

- Ability to provide SEO solutions for single page apps

- Extensive knowledge of CSS and JS methods for providing perform ant visual effects and keeping the frame rate above 30fps at all times

- Thorough understanding of the responsibilities of the platform, database, API, caching layer, proxies, and other web services used in the system

- Validating user actions on the client side and providing responsive feedback

- Writing non-blocking code, and resorting to advanced techniques such as multi-threading, when needed

- Creating custom, general use modules and components which extend the elements and modules of core AngularJS

- Experience with all levels of operation available to the front-end, such as from creating XHRs in vanilla JS to using a custom wrapper around $resource

- Experience with building the infrastructure for serving the front-end app and assets

- Architecting and automating the build process for production, using task runners or scripts

- Documenting the code inline using JSDoc or other conventions

- Writing extensive unit tests using automated TDD tasks

- Creating e2e test suites for all components, and running them with Protractor (or a well reasoned alternative)

- Creating configuration, build, and test scripts for Continuous Integration environments

Education: Minimum of any bachelor's degree or higher is preferable.
